

## ARC1300<sup>OEM</sup> Developer's Kit

### OEM USB/RS232 Contactless Smart Card Reader

ARC1300<sup>OEM</sup> is a high performance contactless ISO 14443 A/B smart card reader for easy integration into a number of smart card applications. The ARC1300 software development kit provides the tools, documentation and code samples needed to successfully integrate and develop contactless smart card applications compliant to ISO/IEC 14443 A/B. The kit allows you to develop customized applications using encrypted data storage, as well as evaluating and integrating cards based on the entire MIFARE family.

#### SDK (Software Development Kit)

- Getting Started Guide
- Tools for Windows, WinCe, Linux or embedded
- Example source code in C++ and C++ API for handling contactless cards and SAMs
- Documentation
- C# wrapper

#### HDK (Hardware Development Kit)

- 1 ARC1300 Smart Card Reader incl. connecting cable
- 2 MIFARE UltraLight™ C sample cards
- 2 MIFARE Classic™ 4K sample cards
- 2 MIFARE DESFire EV1 4K sample cards
- 2 MIFARE Plus 4K - 7BUID sample cards
- Documentation (electrical and mechanical)
